Feather surgical blades No.350/No.391 are the small sized surgical blades that can be handled in a narrow space of the oral cavity. These blades enable to perform the micro incision especially for the microsurgery. Please use No.350/No.391 as well as other Feather surgical blades No.370, No.390, and No.390C for the microsurgery according to the cases.

No.350
The blade shape allows to perform a micro incision.
Width: 2.0mm

No.391
Allows to perform a safer incision and high operability.
Total length is 3mm longer and blade length is approximately a half of No.390.

The blades can attach to Feather Surgical Handle.
Applicable handles
