Surgical blade

Various types are available to meet diverse needs. Each is scientifically designed for smooth loading, functional handling ease and perfect balance. The handles are made of stainless steel (except DF-1605-3) to assure long life service and the blade integrates into the handles to form a single instrument. Handles No. 3, 7, 13 and DF-1605-3 accommodate blades No.10, 11, 12, 16, 14, 15, 15c, 15s, 350, 370, 390, 1900C and 391. Handle No. 6 and 4 are designed for use with blades No.20, 21, 22, 23, 24 and 25.

Blade handle for surgical blade

Blade remover

Feather Blade remover enables safe and easy removal of used disposable blades from any size or type of scalpel handles. It improves safety and hygiene by eliminating direct contact with blades and facilitates replacement.

Blade pliers

Feather Blade Pliers No.3 enable users to remove a Surgical blade from the handle safely. The pliers can be cleaned and sterilized after use.
Surgical blade

Feather surgical blades are available in either stainless steel or non-ferrous carbon steel that satisfies a wide range of demands of surgeons. The blades are individually wrapped and the packages are gamma sterilized. FEATHER is a leader in technological innovation and the creation of extremely sharp, durable blades.

Sterile disposable scalpel

The Feather disposable scalpel is the last word in precision. Feather, utilizing feedback from surgeons, has developed a design with the sharpest cutting edge available today. Well-balanced construction, remarkable durability and in-the-package sterility further enhance total performance. Best of all, these throw-away scalpsels are highly economical.

Economical & efficient
Fully automated Feather production and quality control systems are the reason why these disposable scalpsels are the first choice of surgeons everywhere. Feather disposable scalpsels provide unsurpassed quality, uniformity and economy.

Indispensable in emergencies
Each scalpel is sterile and ready for use as soon as it's removed from the pull-open aluminum wrapper. You can carry and use them.

Disposable scalpel - Standard

Disposable scalpel - Deep
These scalpsels feature a plastic handle about twice as long as the standard type for convenient use in deep operations. Available with blades No. 10, 11, 15, 20, 21, 22, 23, 24 and 25.

Disposable scalpel - Mini
This type features a slender plastic handle and is highly suitable for use in surgery in limited areas, for example, the brain, nerves, ears, nose, mouth, plastic surgery, blood vessels, skin and infants. Available with blades No. 11, 15, 15c and 15.

Sterile Safeshield Scalpel

Clear protective shield can be advanced (to cover the blade) and retracted multiple times. 11 sizes are available and color-coded on the protective shield assists blade identification.

How to open the package
Simply pull the package off by pulling apart the two flaps, as indicated.

How to remove the snap-off cover
The blade cover is easily removed by applying firm pressure to the unshield, as indicated.

Safeshield Scalpel Vessel

Feather "Safeshield Scalpel Vessel" is designed for custom procedure tray/kit. The safety cover protects the blade in procedure and handling. Supplied in plastic box of 100 pcs, non-sterile.

Safeshield Scalpel Vessel

Feather "Safeshield Scalpel Vessel" is designed for custom procedure tray kit. The safety cover protects the blade in procedure and handling. Supplied in plastic box of 100 pcs, non-sterile.
Surgery

Disposable blood lancet

Feather Blood Lancet assures superior hardness and sharpness. Each lancet is individually packed and sterilized by Gamma radiation.

Dermatology

Disposable dermatome

Wavy surface brings easy collection of skin tissue.

Skin graft knife blade

Feather skin graft knife blade is a disposable blade made of stainless steel. Its sharp edge offers a smooth grafting for the broken skin. Skin graft knife blade (SGB-157) is compatible with the following brands: ROSENBER, BRATHWAIR, CORBET, and WATSON.

Biopsy punch

Feather Biopsy Punch offers excellent sharpness by ultraprecision sharpening technology which originates in surgical blade manufacturing.

Skin Scraper

Feather Skin Scraper is a scalpel suitable for tissue collection for diagnosis of mycosis. Edge is not sharpened and it can be safely used without cutting skin. 1 mm thick scalpels allows firm and easy tissue collection. Autoclavable.

Others

Chokkin (with strap)

Pocket-sized scissors designed for exceptional handling ease, cutting ability and safety. "Chokkin" scissors are small enough to fit in a nurse's pocket. And come with a holder and clip for easy access without damage to the pocket. The perfect tool for the day-to-day hospital routine of nurses. Blade edges are specially processed with fluoroplastics. Residual glue from adhesive tape will not cling to blade after cutting, thus assuring smooth cutting reliability of the scissors.

Improved Safety

The handle is rounded and protected with a plastic guard. When cutting bandages, only the plastic guard touches the skin. Thus, adding relief and reassurance to the patient during cutting procedures.

Friendly Design

"Chokkin" are designed with gentle, curved lines. "Chokkin" also come in a special "kobe" configuration for pediatric nurses that are designed to alleviate anxiety in younger patients.
